

Exercicio 1: Automatización de probas end-to-end

Esta tarefa parte da tarefa T0203 CI/CD en Gitlab. Nela vas ter que crear un novo `job` para a `stage`probas``. Esta novo `job` executará unha proba end-to-end utilizando o paquete `pexpect`.

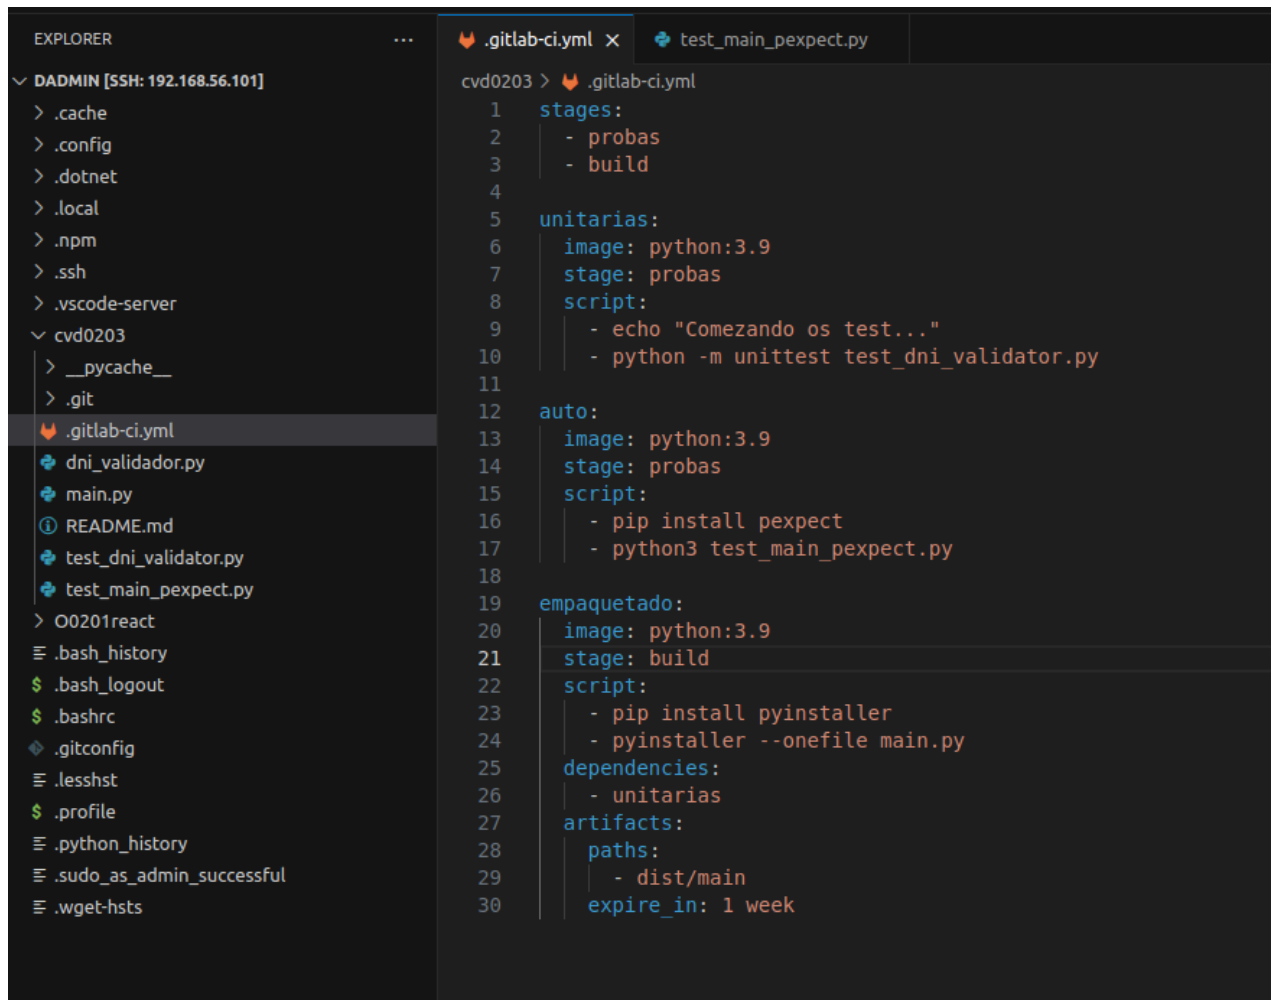

Para iso necesitarás o seguinte ficheiro (é o que executa este tipo de probas) `test_main_pexpect.py`:

Para realizar isto no `job` ten en conta que:

- Necesitarás instalar o paquete `pexpect` con `pip`.
- O comando para executar esta proba é `pytest test_main_pexpect.py`.

Entrega capturas de:

- O ficheiro de configuración de CI/CD.

The screenshot shows a code editor with two panes. The left pane, titled 'EXPLORER', displays a file tree for a project named 'DADMIN [SSH: 192.168.56.101]'. The tree includes directories like '.cache', '.config', '.dotnet', '.local', '.npm', '.ssh', '.vscode-server', and 'cvd0203'. Under 'cvd0203', there are files: '__pycache__', '.git', '.gitlab-ci.yml' (selected), 'dni_validador.py', 'main.py', 'README.md', 'test_dni_validator.py', and 'test_main_pexpect.py'. The right pane shows the content of the selected file, '.gitlab-ci.yml', with line numbers 1 through 30. The configuration defines three stages: 'probas' (containing 'unitarias' and 'auto' jobs) and 'build' (containing 'empaquetado' job). The 'unitarias' job uses 'python:3.9' and runs 'python -m unittest test_dni_validator.py'. The 'auto' job also uses 'python:3.9' and runs 'pip install pexpect' followed by 'python3 test_main_pexpect.py'. The 'empaquetado' job uses 'python:3.9' and runs 'pip install pyinstaller' followed by 'pyinstaller --onefile main.py'. It also lists 'unitarias' as a dependency and defines an artifact 'dist/main' that expires in 1 week.

```
1 stages:
2   - probas
3   - build
4
5 unitarias:
6   image: python:3.9
7   stage: probas
8   script:
9     - echo "Comezando os test..."
10    - python -m unittest test_dni_validator.py
11
12 auto:
13   image: python:3.9
14   stage: probas
15   script:
16     - pip install pexpect
17     - python3 test_main_pexpect.py
18
19 empaquetado:
20   image: python:3.9
21   stage: build
22   script:
23     - pip install pyinstaller
24     - pyinstaller --onefile main.py
25   dependencies:
26     - unitarias
27   artifacts:
28     paths:
29       - dist/main
30     expire_in: 1 week
```

- A execución deste `job` onde se vexan os comandos que se lanzaron na interface web.
